

NUBONE^{XB}
GET XTRA BOTTOM END TONE

PRECISION ENGINEERED NUTS AND SADDLES

Over **200**
sizes
available!

* Ideal for ukuleles and guitars with laminate tops, backs or sides

Upgrade Your Ukulele

NuBone XB (Extended Bass Response) is the latest innovation in our NuBone nut and saddle line. By simply replacing your current nut and saddle with NuBone XB, you'll get increased bass response, add rich harmonics and improved tone to most ukuleles.

"NuBone XB nuts and saddles give our ukes increased volume and sustain while adding clarity and sweetness to each note. We are very stoked to be partnering with Graph Tech and featuring their products on the majority of our instruments."

Michael Upton - President, Kala Brand Music Co.

How Does It Work?

NuBone XB (Extended Bass Response) is the latest innovation in our NuBone line. Manufactured under high heat and pressure, NuBone XB is specially formulated to produce more bass harmonics.

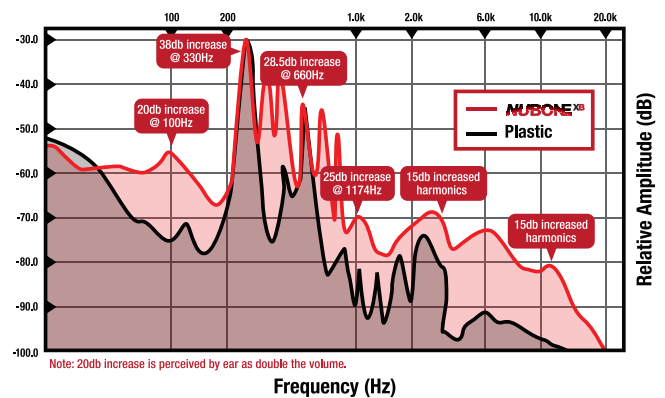

By transferring the optimum frequencies to the guitar, NuBone XB increases low end volume, tone and harmonics. Plastic nuts and saddles vary greatly, often turning out too soft, too brittle or hollow. These inconsistencies kill tone, dampen sound, interrupt the string vibrations and do nothing to increase the harmonic content of the guitar.

Some synthetic materials actually hinder the frequencies of the guitar, and do not allow it to perform to it's full potential. NuBone XB is strong, durable, and consistent throughout to ensure superior vibration transfer.

How Does It Sound?

With many of the same tone enhancing qualities of TUSQ, NuBone XB has a great low end harmonic content. Now ukuleles and guitars at any price point can have the low end response of a high end instrument.

NUBONE^{XB} vs Plastic

- Extended low-end harmonics and over-all volume
- Increased harmonic content and richness
- Light weight and highly rigid, durable material for optimum vibration transfer
- Consistent quality from piece to piece - no flat or dead spots
- UV resistant - won't lose its color over time

Ukulele Upgrade Kit

Specially formulated for ukuleles to increase volume and enhance low end harmonics
